

Project Name	Automation of Primary Heating Stations - Phase 2
Start – End	January 2022 – December 2022
Project Value	1.000.000 EUR
Slovenian Funding	300.000 EUR
Recipient Country/ Donation Recipient	Serbia / Public utility company Novosadska toplana
CRS CODE	CRS CODE 23620
Project Description	<p>In 2018, Novosadska toplana, with the donation of the Republic of Slovenia, carried out a project of automation of 440 heating stations. As part of the continuation of the project, further 125 primary heating stations were supposed to be automated and connected to the remote monitoring and control system. This would fully automate all heating stations with a power greater than 150kW. In the heating stations, the machine elements were supposed to be replaced, and the automation of all control circuits for heating and hot water distribution carried out. A communication connection of the electronic controller with the existing remote monitoring and control system was supposed to be established and the SCADA system upgraded. Novosadska toplana withdrew from the realization of the project at the end of 2022 due to the energy crisis and high natural gas prices.</p>
Project Phase	The project was not implemented.
