| <b>Project Name</b>                              | Design and Construction of Public Water Treatment Plant for Waste Waters in Žabljak Municipality  |
| <b>Start – End</b>                               | September 2012 – December 2013  |
| <b>Project Value</b>                             | 1.039.866 EUR   |
| <b>Slovenian Funding</b>                         | 484.500 EUR   |
| <b>Recipient Country/<br/>Donation Recipient</b> | Montenegro / Ministry of Sustainable Development and Tourism  |
| <b>CRS CODE</b>                                  | CRS CODE 14021  |
| <b>Project Description</b>                       | The donation of the Republic of Slovenia has supported the project of construction of the municipal infrastructure, notably the construction of an interceptive canal and the set-up of wastewater treatment plant in Žabljak. The project will limit the pollution of groundwater and drinking water catchments, thus improving the health safety of the population. The improved infrastructure has set the appropriate conditions for the construction of tourist facilities, which will enable job creation and economic development of the area. |
| <b>Project Phase</b>                             | The project is concluded.   |
