

Project Name	Landfill Rehabilitation in Korçë Region
Start – End	January 2016 – December 2019
Project Value	295.000 EUR
Slovenian Funding	147.500 EUR
Recipient Country/ Donation Recipient	Albania / Municipality of Devoll
CRS CODE	CRS CODE 14050
Project Description	The local landfill in Devoll has been dangerous for the population because the leachate flowed untreated into a nearby source of drinking water. Within the project, the landfill was partially rehabilitated, 25,000 m ³ of waste was compressed and covered with a temporary soil layer, which prevents direct contact of waste with people and animals, reduces odours and prevents the scattering of waste due to the wind. With the realization of the project, the pollution of the environment, especially drinking water, was reduced, which improved the health safety of the inhabitants.
Project Phase	The project is concluded.
