

<b>Project Name</b>	Design and Rehabilitation of the Dumpsite in Plav
<b>Start – End</b>	January 2016 – December 2022
<b>Project Value</b>	247.000 EUR
<b>Slovenian Funding</b>	123.500 EUR
<b>Recipient Country/ Donation Recipient</b>	Montenegro / Ministry of Sustainable Development and Tourism
<b>CRS CODE</b>	CRS CODE 14050
<b>Project Description</b>	<p>The previous landfill in the municipality of Plav polluted water resources, its rehabilitation was therefore essential in order to avoid negative impacts on the environment and on human health. Sustainable solution was found to be the most suitable. Ecoremediation measures are based on the natural self-cleaning mechanisms that involve the operation of the plant to uptake water, plant nutrients and a variety of pollutants present in the soil and oxygen uptake, and various metabolic products that accelerate microbial activity in the soil, microbial conversion of various pollutants in the soil and various physical and chemical transformation and retention of pollutants. Ecoremediations represent a long-term solution for the purification of waste water from landfill and ensure the conservation of nature.</p>
<b>Project Phase</b>	The project is concluded.
