

Project Name	Ecoremediation Strategy for Montenegro and Preparation of a new Action Plan for the period up to 2035, including a Pilot Project
Start – End	January 2023 – May 2025
Project Value	390.000 EUR
Slovenian Funding	195.000 EUR
Recipient Country/ Donation Recipient	Montenegro / Ministry of Ecology, Spatial Planning and Urbanism
CRS CODE	CRS CODE 41010
Project Description	<p>In September 2014, the Government of Montenegro adopted the Ecoremediation Strategy for Montenegro, which is part of the Action Plan 2014-2020, the preparation of which was supported by a grant from the Republic of Slovenia. The project will revise the existing document and prepare a new Action Plan for the period 2023-2035, including a pilot project for the construction of a sewage treatment plant to treat sewage sludge in Savnik or another municipality. The ecoremediation measures will support the achievement of water, wastewater, waste and other environmental objectives. The project will have a direct impact on the improvement of the environment, as the analysis of environmental problems in the Action Plan will include proposals for solutions in a large number of municipalities in Montenegro, and the implementation of the pilot project in Savnik will allow for the design and construction of a small sewage treatment plant for sludge treatment, where the sludge problem is currently not regulated.</p>
Project Phase	The project is being implemented.
