

<b>Project Name</b>	Establishment of Solar Plants in Banja Luka
<b>Start – End</b>	January 2023 – November 2023
<b>Project Value</b>	825.000 EUR
<b>Slovenian Funding</b>	247.500 EUR
<b>Recipient Country/ Donation Recipient</b>	Bosnia and Herzegovina / Vodovod a. d. Banja Luka
<b>CRS CODE</b>	CRS CODE 23230
<b>Project Description</b>	<p>In Banja Luka, the water supply consumes a large amount of electricity generated from non-renewable sources, and the cost of providing the public service has increased by more than 100% in recent years. The project will install three solar power plants of 3 x 250 kW, which will significantly reduce the energy dependency on the public energy system, which is currently based on conventional fossil fuels. The project has a positive impact on the environment by replacing electricity production from non-renewable sources with renewable energy production, reducing CO2 emissions, promoting green jobs and a circular economy, offering a multifunctional use of space and ensuring the promotion of renewable energy in the city of Banja Luka and in BiH. The project also has a direct impact on the users of the public water supply system, who are faced with rising electricity prices, and thus other public services, such as access to healthy and clean drinking water.</p>
<b>Project Phase</b>	The project was not implemented.
