| Project Name | Enhancement of Protection of Monument of Nature – Dojran Lake through Improved Wastewater Treatment in Dojran Municipality |
| Start–End | January 2023–September 2025 |
| Project Value | 2.489.855 EUR |
| Slovenian Funding | 1.278.952 EUR |
| Recipient Country/ Donation Recipient | North Macedonia / Municipality of Dojran |
| Project Contractor | EHI d.o.o. export-import, Petrovec Geomap Dizajn DOOEL Skopje |
| CRS CODE | CRS CODE 14022 |
| Project Description | <p>Lake Dojran is a natural monument of national importance and an internationally important nature conservation site. The water quality of Lake Dojran has deteriorated drastically in recent years due to pollution from the existing wastewater treatment plant in Novi Dojran, which directly discharges inadequately treated wastewater into the lake, and the lack of a system for collecting and treating wastewater in the villages in the Lake Dojran catchment area. The project will construct a conventional wastewater treatment plant based on MBBR technology for the urban areas of Novi Dojran, Stari Dorjan and Sretenovo, and two plant-based wastewater treatment plants for the villages of Furka and Crničani. The new infrastructure will reduce the pollution of the lake with wastewater and allow for the revitalisation of the ecosystem and the establishment of a resilient wastewater treatment infrastructure with lower energy consumption.</p> |
| Project Phase | The project is being implemented. |
