

<b>Project Name</b>	Green Energy for Better Future
<b>Start–End</b>	January 2023–September 2024
<b>Project Value</b>	200.000 EUR
<b>Slovenian Funding</b>	100.000 EUR
<b>Recipient Country/ Donation Recipient</b>	North Macedonia / Municipality of Štip
<b>Project Contractor</b>	KMG EOL Kvazar DOOEL Skopje, Graditel doo Štip
<b>CRS CODE</b>	CRS CODE 23183
<b>Project Description</b>	<p>Public buildings in Štip are characterised by low energy efficiency, which is also the case for the kindergarten building of Vera Ciriviri Trena. The project foresees the renovation of the kindergarten, which will be environmentally friendly and in line with energy efficient standards. To this end, the roof will be reconstructed and photovoltaic cells will be installed. In addition, the municipality of Štip is facing a lack of awareness of the population in the field of environmental protection and energy efficiency, which is why the project will organise appropriate educational programmes, training and workshops. The project thus aims to increase the energy efficiency of the kindergarten building and to strengthen the general environmental awareness of the inhabitants of the municipality of Štip.</p>
<b>Project Phase</b>	The project is being implemented.
