

Project Name	Green Energy for Local Institutions
Start–End	January 2023–June 2024
Project Value	102.982 EUR
Slovenian Funding	51.491 EUR
Recipient Country/ Donation Recipient	North Macedonia / Municipality of Kriva Palanka
Project Contractor	MG PROEKT DOOEL Skopje, KMG EOL Kvazar DOOEL Skopje
CRS CODE	CRS CODE 23230
Project Description	<p>Kriva Palanka has more than 250 days of sunshine a year, which represents an important source of energy that the local community could use for its own production. To this end, the municipality wants to enable five local institutions in Kriva Palanka to produce their own solar energy by installing solar panels on their roofs. The project foresees the purchase and installation of solar panels on five municipal buildings (kindergarten, boarding school, local museum, primary school and municipal administration building). The installed solar panels will provide 8-9 kW per building or a total of 42.77 kW of electricity. The project has a significant impact on the environment as it contributes to reducing the consumption of energy produced from fossil fuels, while the more efficient operation of the institutions will have a positive impact on economic growth, quality of life and improved working conditions for the local population.</p>
Project Phase	The project is being implemented.
