

<b>Project Name</b>	Rehabilitation of Water Treatment Plant Alagovac
<b>Start–End</b>	September 2019–September 2022
<b>Project Value</b>	1.549.578 EUR
<b>Slovenian Funding</b>	423.390 EUR
<b>Recipient Country/ Donation Recipient</b>	Bosnia and Herzegovina / Municipality of Nevesinje
<b>Project Contractor</b>	Esotech d.d., Velenje
<b>CRS CODE</b>	CRS CODE 14021
<b>Project Description</b>	<p>In 1964, the artificial lake Alagovac was built to supply the municipality of Nevesinje with drinking water. Precipitation water is also discharged into the lake, making the water increasingly cloudy. The existing Alagovac drinking water treatment plant has a capacity of 40 l / s and does not provide sufficient supply of quality drinking water. Within the project, the Alagovac drinking water treatment plant with a capacity of 70 l / s (252 m<sup>3</sup> / h flow rate) will be reconstructed and upgraded with all the necessary chemical processes to meet the prescribed standards. The implementation of the project will ensure sufficient drinking water of adequate quality. The project will have a positive impact on the health of the population and increase the chances of development of the municipality.</p>
<b>Project Phase</b>	The project is concluded.
