

Project Name	Design and Construction of Wetlands in Andrijevica
Start–End	November 2018–December 2022
Project Value	749.000 EUR
Slovenian Funding	374.500 EUR
Recipient Country/ Donation Recipient	Montenegro / Ministry of Sustainable Development and Tourism
Project Contractor	Limnos d.o.o. Ljubljana and Intermost d.o.o., Podgorica
CRS CODE	CRS CODE 14022
Project Description	<p>There are 1000 households connected to the sewerage network in the municipality of Andrijevica, while companies and schools, as well as majority of the population living outside the center of the municipality, were using septic tanks. The collected wastewater flowed untreated into the Zlorečica River, thereby greatly polluting the environment. Within the project, the project documentation was prepared first, and in the second phase, a wetland with a capacity of 600 PE was built. Wetland is an ecological solution for the treatment of wastewater using plants. The project will help reduce the harmful emissions and concentrations of waste water and improve the health safety of the inhabitants. Wastewater management will also considerably contribute to the protection of water courses.</p>
Project Phase	The project is concluded.
