Project Description	<p>City of Kraljevo recorded high electricity consumption for providing public lighting, which was obsolete and without proper supervision. Within the project the partial reconstruction of public lighting and installation of a new control and management system were carried out. The bulbs in use have been replaced by LED bulbs that meet the standards in terms of energy efficiency and light pollution, as well as adequate illumination of roads and other surfaces. The purpose of the project was to modernize public lighting, which allowed to save energy and reduce light pollution, thereby reducing the burden on the environment.</p>
Project Phase	The project is concluded.
