

<b>Project Name</b>	Revitalization and Automation of the Existing Drinking Water Supplying Objects in Probistip Municipality
<b>Start–End</b>	September 2018–December 2019
<b>Project Value</b>	1.199.600 EUR
<b>Slovenian Funding</b>	599.800 EUR
<b>Recipient Country/ Donation Recipient</b>	North Macedonia / Probištup Municipality
<b>Project Contractor</b>	Iskra Sistemi – M DOOEL Skopje, Fortuna Inženering d. o. o. Skopje
<b>CRS CODE</b>	CRS CODE 14021
<b>Project Description</b>	In 2013, the Municipality Probištup, with the help of the donation of the Republic of Slovenia, has installed a treatment plant for the preparation of drinking water. Due to the steady increase in the number of households (the construction of the water supply system to the nearby settlements and the increase in the population in the city due to the provision of jobs within the mine and the factory of accumulator batteries) and the growth of industrial production, the consumption of drinking water is increasing, which is why it is necessary to increase the capacity of drinking water production. Within the project, five interconnected water-supply facilities in the municipality of Probištup was restored, which will enable efficient and uninterrupted supply of drinking water to the inhabitants.
<b>Project Phase</b>	The project is concluded.
