

<b>Project Name</b>	Support of the Government to actualize existing plans and documentation to meet requirement as set in the EU Directives 2002/EC/22 and 2009/EC/136
<b>Start–End</b>	January 2016–November 2016
<b>Project Value</b>	30.000 EUR
<b>Slovenian Funding</b>	30.000 EUR
<b>Recipient Country/ Donation Recipient</b>	North Macedonia / Crisis Management Center
<b>Project Contractor</b>	Dispo.net; Gregor Jänin
<b>CRS CODE</b>	CRS CODE 74010
<b>Project Description</b>	The introduction of the 112 System is an obligation of the Republic of Macedonia, based on the Directive 2002/22/EC of the European Parliament and of the Council on universal service and users' rights relating to electronic communications networks and services. For the implementation of an integrated 112 project it was necessary to review the feasibility study of the system, which was completed in 2009, but unfortunately the 112 System has never been implemented. The audit has determined what kind of system are appropriate and can be deployed in a specific location on the basis of a specific analysis of the existing situation in Macedonia.
<b>Project Phase</b>	The project is concluded.
