

<b>Project Name</b>	Reforestation Measure in Ersekë
<b>Start–End</b>	January 2016–December 2017
<b>Project Value</b>	560.000 EUR
<b>Slovenian Funding</b>	280.000 EUR
<b>Recipient Country/ Donation Recipient</b>	Albania / Municipality of Kolonjë
<b>Project Contractor</b>	BCCD Tirana
<b>CRS CODE</b>	CRS CODE 31220
<b>Project Description</b>	In the last 25 years most of the forests in Albania were cut down, and the country now faces a number of floods and land sliding. In October 2015, a large avalanche slid above the city Ersekë that destroyed the road (the only link with the North), a gas station, an orchard and a few houses. Within the project the solutions for the selected area have been designed which include the transfer of knowledge from experts from Slovenia. A detailed analysis of the location have been conducted. A planting plan for afforestation has been drawn up, which took into account the type of seedlings and later use and carried out by planting appropriate plants for planting .
<b>Project Phase</b>	The project is concluded.
