

Project Name	Design and Rehabilitation of the Dumpsite in Plav
Start–End	January 2016–December 2022
Project Value	247.000 EUR
Slovenian Funding	123.500 EUR
Recipient Country/ Donation Recipient	Montenegro / Ministry of Sustainable Development and Tourism
Project Contractor	Limnos d.o.o., Ljubljana
CRS CODE	CRS CODE 14050
Project Description	<p>The previous landfill in the municipality of Plav polluted water resources, its rehabilitation was therefore essential in order to avoid negative impacts on the environment and on human health. Sustainable solution was found to be the most suitable. Ecoremediation measures are based on the natural self-cleaning mechanisms that involve the operation of the plant to uptake water, plant nutrients and a variety of pollutants present in the soil and oxygen uptake, and various metabolic products that accelerate microbial activity in the soil, microbial conversion of various pollutants in the soil and various physical and chemical transformation and retention of pollutants. Ecoremediations represent a long-term solution for the purification of waste water from landfill and ensure the conservation of nature.</p>
Project Phase	The project is concluded.
