

<b>Project Name</b>	Design and Construction of the Torrent Sanitation in the area of Topcic polje
<b>Start–End</b>	January 2015–June 2021
<b>Project Value</b>	1.000.000 EUR
<b>Slovenian Funding</b>	500.000 EUR
<b>Recipient Country/ Donation Recipient</b>	Bosnia and Herzegovina / Municipality Zenica
<b>Project Contractor</b>	Hidroinženiring d.o.o., Ljubljana
<b>CRS CODE</b>	CRS CODE 14040
<b>Project Description</b>	<p>Topčić polje was inundated with torrential water and debris flows torrents in the May 2014 floods, which caused serious damage. Republic of Slovenia co-financed the first phase of the rehabilitation of streams, which included the preparation of the project documentation for first and second phase and earthworks of the first phase. Project documentation includes comprehensive arrangement of the streams, control of torrential sediment and integration of anti-erosion measures in other land use activities (forestry, agriculture, infrastructure ...). The project has significantly contributed to the reduction of damage by new rainfall and lower the risk of losing human lives.</p>
<b>Project Phase</b>	The project is concluded.
