| Project Description | <p>The purpose of the project was the development and introduction of sustainable management of the River Tara. A management plan for paddling and fishing on Tara was drawn up, taking into account the provision of security, the preservation of the natural environment, quality experience for visitors and sharing of economic opportunities between local communities along the river. Suitable entry and exit points for kayaking and rafting were identified and marked with boards. The project will bring socio-economic and environmental benefits to local communities, which will be more involved in the exploitation of tourism potential of the river, while also preserving the natural environment.</p> |
