

<b>Project Name</b>	Landfill Rehabilitation in Korçë Region
<b>Start–End</b>	January 2016–December 2019
<b>Project Value</b>	295.000 EUR
<b>Slovenian Funding</b>	147.500 EUR
<b>Recipient Country/ Donation Recipient</b>	Albania / Municipality of Devoll
<b>Project Contractor</b>	BCCD, Tirana Limnos, Ljubljana
<b>CRS CODE</b>	CRS CODE 14050
<b>Project Description</b>	The local landfill in Devoll has been dangerous for the population because the leachate flowed untreated into a nearby source of drinking water. Within the project, the landfill was partially rehabilitated, 25,000 m <sup>3</sup> of waste was compressed and covered with a temporary soil layer, which prevents direct contact of waste with people and animals, reduces odours and prevents the scattering of waste due to the wind. With the realization of the project, the pollution of the environment, especially drinking water, was reduced, which improved the health safety of the inhabitants.
<b>Project Phase</b>	The project is concluded.
