

Project Name	Design and Construction of Waste Water Treatment Plant in Zlatibor
Start–End	April 2016–December 2022
Project Value	4.464.707 EUR
Slovenian Funding	1.500.000 EUR
Recipient Country/ Donation Recipient	Serbia / Municipality of Čajetina
Project Contractor	Hidroinženiring d.o.o, Ljubljana
CRS CODE	CRS CODE 14022
Project Description	<p>Waste water in urban areas of Čajetina and Zlatibor were collected in sewerage networks and in small cesspools. Waste water flows into the river Obudojevica and then into river Drina, which is protected natural environment. Waste water contaminates the environment with the threat to human health and therefore regulation of the issue was one of the priorities of the Municipality of Čajetina. Treatment plant for waste waters with a capacity of 20.000 PE was built. The main objective of the project has been to protect and improve the water quality of rivers, increase health of the population and contribution to the development of the region.</p>
Project Phase	The project is concluded.
