

Project Name	Set-up and Start-up of Recycling Centre for Municipal Waste
Start–End	May 2010–December 2011
Project Value	474.000 EUR
Slovenian Funding	184.000 EUR
Recipient Country/ Donation Recipient	Montenegro / Public enterprise Čistoča, Herceg Novi
Project Contractor	AC Sistemi d.o.o., Ljubljana
CRS CODE	CRS CODE 14050
Project Description	<p>The Municipality of Herceg Novi is one of the first cities in Montenegro which successfully introduced the system of separate waste collection. A recycling centre for municipal waste has been built as part of the project. The sorting line separates useless waste from the potentially useful, which is prepared for recycling at this point. After the separation various conveyors, sorting cabins and a hydraulic press system with a baler ensure individual collective technological procedures, which end with baling of individual fractions, prepared for economical waste recycling. The project has contributed to the substantial reduction of the total volume of waste disposed at the landfill and has enabled the development of the economically feasible sustainable management of partially renewable resources.</p>
Project Phase	Project is concluded.
