

<b>Project Name</b>	UCG - Module Tax Accounting for Tax Administration of the Republic of Montenegro
<b>Start–End</b>	December 2006–June 2009
<b>Project Value</b>	1.620.000 EUR
<b>Slovenian Funding</b>	380.000 EUR
<b>Recipient Country/ Donation Recipient</b>	Montenegro / Tax Administration of Montenegro
<b>Project Contractor</b>	Hermes SoftLab d.d., Ljubljana.
<b>CRS CODE</b>	CRS CODE 15111
<b>Project Description</b>	The aim and objective of the project was to introduce a system of unified registration of taxpayers and policyholders by establishing a central register, which enables centralized collection, processing and notifying about levied taxes and revenue of each of the policyholders during each payment of income (Unified Collection Gateway – UCG). The new system performs the function of tax accounting in the existing information system of Tax Administration in a way that all the data of levied taxes and contributions is forwarded to tax accounting, where all adjustments of liabilities and contributions, as well as calculation of interests, are carried out. Processed data is then returned to the system of unified payments for further use. The project has insured a transparent and simplified performance of taxpayers.
<b>Project Phase</b>	Project is concluded.
