

Project Name	Green Energy for Local Institutions
Start–End	January 2023 – October 2024
Project Value	68.951,99 EUR
Slovenian Funding	33.109,09 EUR
Recipient Country/ Donation Recipient	North Macedonia / Municipality of Kriva Palanka
Project Contractor	MG PROEKT DOOEL Skopje, KMG EOL Kvazar DOOEL Skopje
CRS CODE	CRS CODE 23230
Project Description	<p>In the Municipality of Kriva Palanka, there are more than 250 sunny days per year, representing a significant energy source that the local community can utilize for self-sufficient production. To take advantage of this resource, the municipality has enabled five local institutions to generate their own solar energy by installing solar panels on their rooftops. As part of the project, solar panels were purchased and installed on five municipal buildings: a kindergarten, a dormitory, a local museum, an elementary school, and the municipal administration building. The installed solar power plants will provide 8-9 kW of electricity per institution, totaling 42.77 kW. The project has a significant environmental impact, as it contributes to reducing energy consumption from fossil fuels. Additionally, the improved efficiency of these institutions will positively influence economic growth, enhance the quality of life, and improve working conditions for the local population.</p>
Project Phase	The project is concluded.
