

Project Name	Support to Key Long-term Energy Efficiency Measures Development (SKLAD)
Start – End	April 2025 – December 2026
Project Value	1.650.000 EUR
Slovenian Funding	1.500.000 EUR
Recipient Country/ Donation Recipient	Montenegro/ The Eco Fund
Project Contractor	The Eco Fund
CRS CODE	CRS CODE 41010
Project Description	<p>The mission of the Eco Fund is to collect and invest financial resources in building a sustainable society in Montenegro, based on the efficient use of natural resources and low-carbon development. By strengthening cooperation with ministries, state institutions, the economy, individuals, NGOs, and national and regional parks, and through cross-sectoral collaboration, the Eco Fund is becoming the main initiator of projects focused on research, monitoring nature, its conservation, effective management, and the use of quality solutions for nature protection and energy efficiency. A key objective is raising public awareness and implementing measures to improve the state of the environment.</p> <p>The funds of this project will be allocated to financing public calls for promoting energy efficiency and electric mobility in Montenegro. Between 2024 and 2026, the Eco Fund will announce 16 public calls to support measures in these areas. In 2024, the focus will be on e-mobility, particularly subsidies for businesses, entrepreneurs, and the public sector for the purchase of electric vehicles and charging stations. In 2025 and 2026, the e-mobility measures will remain the same, with additional support for energy efficiency in buildings, the installation of high-efficiency heating/cooling systems, the use of renewable energy sources, lighting upgrades, smart energy management solutions, and other measures to reduce greenhouse gas emissions.</p> <p>The priority given to e-mobility is based on a document initiated by the Eco Fund and adopted by the Government of Montenegro in December 2023. Road transport is the second-largest source of CO2 emissions (30%), representing a challenge in light of the expected increase in road travel by 2035.</p>
Project Phase	The project is being implemented.
